WORLD WATER DAY PODCAST GUIDE

Repair the World is honored to be able to share the stories and approaches towards water access and action from these four unique perspectives from across the country. These podcasts were produced and recorded by Ella Fies, a current MSW student at Columbia University. Prior to moving to NYC she was a **Repair the World Fellow in Miami** for two years! As a fellow in Miami she spent much of her time volunteering with LEAP for Ladies and, during her first year, created the mini podcast series "The Contributors Cauldron" with her fellow Fellow Julia Schantz. She is an avid listener and lover of podcasts, so if you have any recommendations her inbox is always open!

Additional information on the interviewees, programs and organizations referenced in our episodes:

Rabbi Ed Rosenthal - Founder of Tikkun HaYam - Repair the Sea, Ed wants to show the wonders of the underwater world through Jewish eyes, while raising awareness about the myriad threats it faces. He believes that when Jews and their communities get involved in any issue, substantive change takes place. Tikkun HaYam was created in order to get the Jewish Community involved to Repair the Sea.
In this episode, Rabbi Ed talked about the Blue Green Initiative and their efforts to replace single-use plastics - the single greatest marine pollutant- across the country.

Javier de Leon - Lead Program Consultant at Lava Mae x, Javier works with partnerships, donations, consulting and shower service. When it comes to Radical Hospitality, he believes that every person on this earth is a gift and needs to be treated lovingly.
Tune into this episode to meet Javier and learn more about Radical Hospitality. Be sure to join us to serve & learn with Lava Mae x and affiliates on Sunday, March 20, 3-4pm ET.

Julie Tsivia - Grade 2 Wastewater Plant Operator at East Bay Municipal Utility District. Julie is passionate about Union membership - AFSCME Local 444 - and proudly started her four year training program at age 54.
In the episode, Julie referenced municipal job opportunities & Civil Service Exams, many similar resources can be found online or by contacting your local municipal agencies.

Eric Rosenblum - Environmental engineer specializing in water resource management and water reuse. Eric is committed to ensuring that our communities have a safe and sustainable supply of water in harmony with the natural environment. We can help by participating in local water conservation and reuse programs as well as urban creek and stream monitoring and protection efforts.
